Suction Cups HPS

Corrugated suction cup at skirt edge

HANWHA

Plastic bag

bag Glass

Materials Deformability

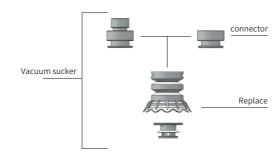

Product characteristics

- * Reinforced body, 1.5 times for safe grip and stability even at high speeds
- * Large nominal flow rate enables high flow rate and short cycle time
- * Circular bellows suction cup, 1.5x, very flexible handling of bags and other types of packaging reliably grabs and handles bags containing liquids, solids or powders as well as packages that are not very full

Product structure

- * 1.5 fold skirt suction cup, soft flexible sealing lip, with segmented flow vane and integrated bag stabilizer
- * Installation using connecting elements; Or connect directly to the pipe via hose clamps all externally threaded connection elements are equipped with integrated seals
- * Optional plug-in filter for pre-filter

Product advantages

- * Very large shaft diameter, large flow
- * Specially reinforced suction bellows for improved stability
- * Silicone SI that meets FDA standards allows direct contact with food
- * Integrated bag stabilizer prevents film and film from being pulled in
