

Auxiliary components

Filter bucket HJF

Caliber 1.5"/2"/2.5"/3"/4"

HANWHA

Utility

Product characteristics

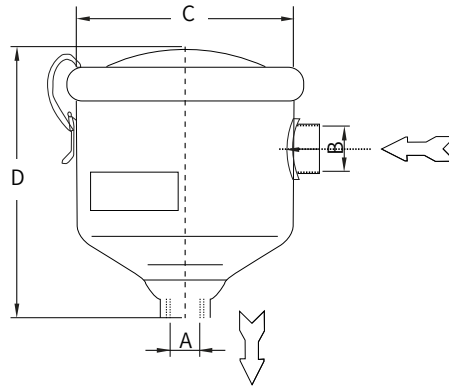

*Vacuum filters can effectively filter the air entering the vacuum system, preventing solid particles or dust from being sucked into the vacuum system, Reduce the wear of vacuum pumps, thereby improving their service life and effectively protecting vacuum system devices

*Used in harsh dust environments, providing excellent filtering effects

*Adopting a steel shell and a buckle type cover, it is sturdy and durable, suitable for industrial heavy load requirements, and has fast inlet and outlet threaded connections, Easy to replace

HJF Design Data

HJF

Size[mm]

Models	A [Air outlet diameter]	B [Air inlet diameter]	C [External diameter]	D [Height]
HJF15	1.5"	1.5"	190	162
HJF20	2"	2"	220	265
HJF25	2.5"	2.5"	220	265
HJF30	3"	3"	220	265
HJF40	4"	4"	335	410
